

JACKLIN *Golf*.[®]

Golf

A sport that combines the allure of nature, the thrill of competition, and a personal challenge to excel.

Golf has captured our imagination for over 500 years and continues to grow universally in popularity and passion. Golf is played in every corner of the globe, and has reached outer space with Alan Shepard's famous 1/2 mile shot with a six-iron!

Golf by definition is, "Playing a ball from the teeing ground into a hole by successive strokes in accordance with the rules." Sir Winston Churchill added, "With weapons ill designed for the purpose." The basic rules by which golf is played have remained stalwart since they were penned by *The Royal and Ancient Golf Society* in 1754. The rules have survived, but the turfgrass on which we play has undergone tremendous change and improvement. This is a result of improvements in genetics, breeding and research by the world's foremost turfgrass scientists.

The playing condition of the turfgrass will leave a lasting impression on the golfer. JacklinGolf® knows that healthy, well maintained turfgrass is the foundation for a successful golf course. Proper establishment and management of turf on a golf course requires exacting specifications and detailed attention by skilled professionals. Your success depends upon selecting the best turfgrass and agronomic information from the world's foremost turfgrass authority...JacklinGolf.

Turfgrass selection should not be left to chance.

JACKLIN Golf

Experience

For over sixty years, Jacklin® Seed Company has successfully provided scientific and practical advice regarding selection and care of turfgrass species and varieties to customers worldwide.

Jacklin Seed Company has introduced more than eighty new turfgrass varieties since our founding and continues to develop new turfgrass varieties each year, making Jacklin Seed the largest private turfgrass research facility in the world. Jacklin expands their commitment to the golf course industry through the services of JacklinGolf®. The JacklinGolf team of agronomists and golf course specialists provides precise grass seed specifications and on-site agronomic consulting to both new and existing golf courses.

Jacklin turfgrass varieties have seeded golf courses in over fifty countries and our consulting services are available worldwide.

The JacklinGolf provides individuals fluent in Chinese, English, Japanese and Spanish, supported with worldwide business and communication experience. Our scope is truly international. We are proud to welcome you to the world of JacklinGolf – practical help for active imaginations.

JacklinGolf provides the knowledge and training necessary to develop the best possible playing conditions for your golf course.

Quality

Proper turfgrass selection is paramount and sports turf is the pinnacle of the grass seed development. Our discipline requires a level of commitment and turf quality that reflects your professional requirements, in appearance, quality and playability. Our lofty Green Seal standards of turfgrass seed quality were developed to exceed even the strict quality levels required for state certification. Jacklin Green Seal approved turfgrass varieties have higher germination, exceptional purity and improved disease resistance. The result: your assurance of the world's finest quality turfgrass seed, specifically designed to fit your golf course turf requirements. Jacklin*Golf* turfgrass varieties are designed to keep you at the top of your game.

The world's finest quality turfgrass seed, specifically designed to fit your golf course turf requirements.

International Service

Good turfgrass quality is the product of strategic planning and experience. That is why the Jacklin*Golf* International Golf Course Consulting Service is in high demand. Jacklin*Golf* Consulting has a vested interest in your project. We want our turfgrass to perform perfectly. But we have a deeper desire to see your golf course project achieve its maximum potential. Our philosophy is straightforward: provide the knowledge and training necessary to develop the best possible playing conditions for your golf course.
